Weight:	150 g/m ²
Thickness:	150 µm
Opacity:	96 %
Whiteness CIE:	130
Lamination:	cool, warm
Standard rolls width:	762 / 1372 / 1524 mm
Standard roll length:	50 m
Storage:	cool and dry environment, at 15 - 25 °C, 50 % rel. humidity
Shelf life:	24 month in original packing

COMPATIBLE INKS:

Eco Solvent:	yes	UVC:	yes
Solvent:	yes	Latex:	yes

Different printers, inks, resolutions and printing qualities result into numerous different printing parameters. In addition, there are numerous factors influencing processing and the application of our materials. For this reason, we cannot make specific statements as to drying times and maximum ink absorption. For this reason, we recommend you to perform own tests in order to verify the desired results. Our product specifications are not to be understood as legally binding guarantees assuring specific characteristics. Any liabilities and guarantees, as well as claims for compensation beyond the value of the product itself are excluded.

Solvent One For All Paper Glossy 150 Neo

Description:

EMBLEM Solvent One For All Paper Glossy 150 Neo is a paper for commercial poster applications when prints with brilliant colours are required. A balanced paper volume ensures a pleasant feel of the glossy-coated paper. The application range of the EMBLEM SOFAP series goes from posters at the POS to demanding photo prints. The wood- and acid-free base paper ensures a stable paper white for longer periods of use. The paper is used both indoors and in protected outdoor areas.

EMBLEM SOFAPGL150N can be printed with commercial eco-solvent, solvent, latex and UV inks. Tests with users and latex dealers confirm the paper's suitability for printers of the current latex generation.

From an ecological point of view, the SOFAP series as a pure paper product is very environmentally friendly, PVC-free, chlorine-free and FSC® (FSC-C119162) certified.

Processing:

Easy further processing due to good drying properties. It can be used in protected outdoor areas if not exposed to direct impact of rain, snow and other weather conditions.

Prints should be covered with a laminate to protect them from abrasion. If the prints do not dry sufficiently, the adhesive may be adversely affected. Care should also be taken to ensure that the print is completely dry and fumes out before laminating, otherwise bubbles may form under the laminate.

Application:

Posters, displays, POS, placards, signage, indoor and outdoor advertising, exhibition graphics, commercial posters for indoor and outdoor applications.
